

## 7 ChatGPT Prompts That Give You a From-Zero YouTube Blueprint

These seven prompts are the exact framework I would use to build a profitable YouTube channel from scratch.

**1.** “List 12 faceless YouTube niches with high CPM and low competition.”  
Profit matters more than popularity.

**2.** “What are 18 highly searched questions in [chosen niche] right now?”  
Demand first. Guesswork last.

**3.** “Write a clear, binge-worthy 65-second script on: ‘[topic]’”  
Short videos get shared. Shared videos grow.

**4.** “Suggest a high-click title and thumbnail concept for this video.”  
No hook means no views.

**5.** “List 6 free, commercial-safe sites for visuals, B-roll, and screen recordings.”  
Production quality does not require a budget.

**6.** “Give me 4 monetization methods for a YouTube channel in [niche] without relying on ads.”  
Build income, not just traffic.

**7.** “Create a 28-day upload schedule optimized for growth and retention.”  
Consistency compounds when it’s planned.

This is not theory.

This is the exact starting playbook I’d use with nothing but time and focus.
